Acer ColorBoost II+ Technology

ColorBoost II+ is an advancement that refines the form of light waves to improve color performance based on lamp spectrum and color-wheel properties. Acer ColorBoost II+ enriches natural color temperature to achieve optical color balance, and enhances content-based color brightness.

Constant Brightness

With Constant Brightness feature enabled, the projector provides constant brightness for the first 3 years (average 700 hours per year of usage time in school), delivering a consistent visual experience to the user, not suffer light source decay.

Crestron® network control

Crestron® is one of the world's biggest network-control system providers. This Acer projector is completely compliant with Crestron® Network System technology. Once this projector is connected to a LAN, it offers many network-control capabilities. This projector supports Crestron RoomView®.

Acer EcoProjection

Acer EcoProjection is a complete environment-friendly power management solution that reduces standby power consumption by up to 90%, from 5 W to 0.5 W. Also featured in the Acer EcoProjection suite is Acer ePower Management for customized power-saving configurations.
