

The Atlona **4K-HDVS-EXT** is an HDBaseT™ transmitter and receiver combination that delivers a complete integration solution with 4K/UHD extension, automatic HDMI and VGA input switching, and automatic display control. It includes the **AT-HDVS-200-TX** three-input HDBaseT switcher and **AT-UHD-EX-100CE-RX-PSE** HDBaseT receiver. The 4K-HDVS-EXT extends HDMI up to 330 feet (100 meters) over category cable with Ethernet pass-through and control. This HDBaseT extender solution supports video signals up to 4K/UHD @ 60 Hz with 4:2:0 chroma subsampling, plus embedded multi-channel audio.

The transmitter is remotely powered by the receiver via Power over Ethernet. This makes the 4K-HDVS-EXT ideal for applications in which the transmitter needs to be installed in a location where local AC power may not be available, such as a lectern or conference room table.

#### 3x1 HDBaseT switcher -

- Features two HDMI inputs plus a VGA input with audio
- Allows advanced HDMI display devices to be used with legacy VGA sources
- Audio input can be assigned to any of the video input

#### 4K/UHD capability @ 60 Hz with 4:2:0 chroma subsampling -

- Compatible with HDMI sources up to 4K/60 4:2:0 and 4K/30 4:4:4
- Supports high resolution applications such as CAD, 3D visualization, desktop publishing, and detailed financial reporting

#### HDCP 1.4 compliant

- Adheres to version 1.4 specification for High-bandwidth Digital Content Protection
- Allows protected content stream to pass between devices

#### Extended distance HDMI extension -

- Transmits AV, control, and Ethernet up to 330 feet (100 meters) @ 1080p with CAT5e/6 or 4K/UHD using CAT6a/7 cable
- Uses easy-to-integrate category cable for low-cost, reliable system installation

#### Automatic Display Control -

- Automatically changes display power state based on active or standby mode of the switcher. Control signals to display are transmitted via IP, RS-232, or CEC
- Eliminates the need for a complex control system

#### Automatic input selection using hot plug detect and video detection technology -

- Selects active input when sources are connected or if there is a change in source power status
- Enables simplified, automatic system operation with no user intervention necessary

#### Transmitter powered by receiver via PoE (Power over Ethernet) -

- Power for transmitter is supplied by receiver over HDBaseT
- Allows convenient transmitter installation at a lectern or conference table without the need for local AC power
