

COLLABORATE Mobile is a SIP/H.323 standards-based and enterprise-grade mobile video collaboration application that extends the reach of video and data collaboration beyond the conference room to tablets and mobile devices, both iOS and Android.

BYOD-friendly and optimized for mobile broadband and Wi-Fi networks, it makes video collaboration an affordable productivity tool for business travelers.

Features

Multi-standard support – H.323 & SIP

- + Content and live data sharing (H.239 & BFCP)

Best-in-class video experience

- + High-quality resolution up to 720p

Call and Control

- + Place and receive calls
- + Far end camera control – FECC
- + Join a conference call on an MCU
- + View real-time statistics

Optimized for any network

- + Use 3G/4G/LTE or wireless connection
- + Secured and encrypted – H.235/AES-128
- + Firewall/NAT traversal – H.460
- + Adaptive bandwidth adjustment

Key Benefits

Standard-based - natively support both H.323 and SIP

Place and receive calls

Built-in firewall traversal

Functional Specifications

SIGNALING PROTOCOLS

SIP
H.323
FW/NAT Traversal: H.460

OPERATING SYSTEMS

Android 2.3-4.X
iOS 5.X and above

VIDEO

H.264
Frame rate: up to 30fps
Resolution: CIF/VGA/SVGA/720p

AUDIO

G.722 and G.711
AEC (Acoustic Echo Cancellation)
Noise suppression
Automatic gain control

DATA SHARING

For SIP: BFCP (up to 15fps)
For H.323: H.239 (up to 15fps)

SUPPLEMENTARY SERVICES

Hold
Mute
Inband DTMF

MANAGEMENT

Call history
Contact list management (in application)

QUALITY

FEC (Forward Error Correction)
Dynamic bandwidth adaption
