## WIRELESS PRESENTATIONS

Present from your phone or tablet using the free App: EZ View. Available for both Android and iOS devices, EZ View gives you the freedom to wirelessly share and present documents, photos, videos and your devices camera turning it into a document camera. Creating a more connected and collaborative experience for everyone.

Instantly connect and display presentation material wirelessly from a PC, Mac or mobile device using the optional mini WiFi dongle which connects discreetly to the USB port on your ML750, bringing you seamless wireless connectivity in a highly portable package. Enjoy big-screen presentations streamed to your projector, cable-free.

## 3D READY

Using the inherent speed of DLP® technology, Optoma 3D Ready projectors can output video and images at an astonishing rate of 120Hz, allowing you to show full screen, full colour, stereoscopic 3D. Useful for both professionals and educators alike, the ML750 brings both teaching and design to a whole new level of immersion and excitement.

Useful for both professionals and educators alike, the ML750 brings both teaching and design to a whole new level of immersion and excitement.

## INSTANT ON/OFF

Quickly setup and pack up with instant power On/Off. LED technology allows the projector to be a full brightness in seconds.

## LED TECHNOLOGY

Using the benefits of LED technology, the ML750 LED projector uses individual Red, Green and Blue LED modules to create the projected image without the need for a colour wheel.

LEDs increase efficiency and have an increased lamp life up to 20,000 hours. Saving you both time and money; while leaving you certain that your projector will be fully operational for many years to come

## COLOUR GUARANTEE

We are so confident that the ML750 image colour quality will remain as good as the day you bought it that Optoma will guarantee it for five years.

## DIGITAL SIGNAGE

Built-in digital signage function. Perfect for digital signage applications such as advertising and museum demos.

## BRIGHT, VIBRANT IMAGES

The ML750 produces bright, vibrant images with deeper saturation, bursting with life. This is due to the exceptional colour fidelity created by LED technology; In many situations the perceived brightness of an LED projector can be up to twice the brightness of an equivalent lamp-based projector.

We know that improving our products is the best way to reduce our impact on the environment. That's why at Optoma, we design our products to have a long usable life, use fewer materials, ship with the minimum packaging and be free of all possible toxic substances. Naturally, energy efficiency and being recyclable are built in at the design stage. With each new product, we strive towards minimising our environmental impact. <sup>1</sup>1.5GB is available when user manuals are removed from the internal memory. <sup>2</sup>Samsung Galaxy S3 & S4 will require an additional adapter. <sup>3</sup>The quoted LED Brightness rating is based on the perceived equivalent ANSI lumen brightness of a standard lamp projector. The LED brightness rating takes into account the Helmholtz-Kohlrausch (HK) effect on the perceived brightness of colours. <sup>4</sup>Typical lamp life achieved through testing. Will vary according to operational use and environmental conditions. <sup>5</sup>Optoma guarantees that in normal use, Optoma DLP® colour quality will be indistinguishable from when new. Exclusions: (a) Guarantee is voided if the projector is subject to damage through misuse. (b) Guarantee may be void in industrial or commercial entertainment environments where dust or smoke is excessive (c) Guarantee will not apply if lamp brightness is below 50% due to wear or if the projector is not working due to other faults. (d) Over time worn lamps within all projector types will show a slight colour variance. Copyright © 2013, Optoma Europe Ltd.
