SONY

PCS-EP

PC Videoconferencing Endpoint Software

This easy-to-use endpoint software allows remote connection from a Windows PC to video conferences hosted on a server running Sony PCS-VCS Series Visual Communication Server Software.

Join virtual meetings from anywhere: at home, in hotels or a temporary office. Share voice, video and PC documents with crisp picture and sound quality.

PCS-EP3 includes license for up to 3 users.
PCS-EP10 includes license for up to 10 users.

PCS-EP must be purchased together with appropriate Support Pack (PCS-EP3SP or PCS-EP10SP).

Operation requires broadband IP connection and Windows PC with embedded Web camera or external USB camera (available separately).

SONY

Features

- **Join meetings from any location**

  This easy to use software turns your Windows PC into a remote conferencing endpoint. Take part in virtual meetings from any location where there's a broadband connection available.

- **High quality video and audio communications**

  See and hear other conference participants with crisp picture quality and clear sound. Video quality up to HD 720p is supported (dependent on PCS-VCS Series Visual Communication Server Software).

- **Easy data sharing**

  Simultaneously stream video, voice and what's on your PC screen. Even share PowerPoint presentations with other remote participants running PC endpoint software.

- **Presence management with contact list**

  Easily view status of your contacts to see who's online, busy, or offline. Just click to call a contact or meeting.
