

# TPHD-BYE20

The TPUH-BYE20 extender kit consists of a transmitter and a receiver, and it extends a 4K@60Hz 4:4:4 HDMI signal up to 131ft/40m or 1080P@60Hz up to 230ft/70m over a single CATx Ethernet cable. It supports bi-directional 24V Power over Cable (PoC), which simplifies the wiring to allow only a single AC power adapter usage. It supports bi-directional IR pass-through extension, allowing for control of local video source device or the remote display. Moreover, it adopts a visually lossless video compression technology (VLC) to ensure the HD lossless transmission of 4K@60Hz 4:4:4

- HDMI 2.0, and HDCP 2.2 compliant..
- Supports video resolution up to 4Kx2K@60Hz 4:4:4.
- Transmission distance is up to 131ft/40m for 4Kx2K, or 230ft/70m for 1080P.
- Bi-directional IR pass-through for long-distance control.
- Bi-directional 24V PoC.
- CEC pass-through.
- Visually Lossless Compression (VLC) technology.
- LED indicators showing work status.
